the method can be searched in 451/54, and the apparatus belongs in 451/359. When you get the election, if the apparatus is elected, then within the first biweek after it is placed on your amended docket, email Joe Hail and me, and we'll take the transfer. If you wait until its more than one month old, I'll advise Joe not to accept it.

I already turned in the restriction for counting & mailing, as it's been over a week since I called the attorney and he hasn't called back. I'd be happy to transfer, if they elect the apparatus, which does not belong in class 427 which is coating processes, nor the coating apparatus of class 118 that's in my group.

I take it that class/sub 451/490+ was the appropriate place for the apparatus claims in this case & you will accept the apparatus claims if elected?

Do you consider the method claims to also have a search in your area?

Thank you,  
Mimi Padgett

Would you like to transfer the case to us instead?

Please consult Maurina Rachuba in my unit for this decision. Thanks,  
Joe

Is class/sub 451/490+ the appropriate place for the apparatus claim in this case? If elected will you accept transfer?

Thank you,

**Subject:** 10/804,435-being restricted

Hi,

I'm doing a restriction for 10/804,435, which will probably be mailed (attorney has not called back) & am looking for the appropriate home for apparatus claims 3-4 directed to a "refinishing tool" having drive means, a flexible drive shaft, a disc for sanding, etc. Is class 451 appropriate, if so what subclass (451/490+?) & if apparatus claims are elected will you accept transfer? if I have the wrong class &/or AU, do you have any suggestions?

This is totally outside my area of examination (the method claims are mine due to UV curing, 427/580 +), so I would appreciate your help.

Thank you,  
Mimi Padgett
